

NetworkBehaviour

```
graph BT; DotTrap --> Trap; Trap --> SpawnableObject; SpawnableObject --> NetworkBehaviour;
```

The diagram consists of four rectangular boxes stacked vertically, each containing a text label. From bottom to top, the labels are: DotTrap, Trap, SpawnableObject, and NetworkBehaviour. Three upward-pointing arrows connect the boxes: one from DotTrap to Trap, one from Trap to SpawnableObject, and one from SpawnableObject to NetworkBehaviour. This indicates a hierarchical or inheritance relationship where DotTrap inherits from Trap, Trap inherits from SpawnableObject, and SpawnableObject inherits from NetworkBehaviour.
